Functional Manager	**Corbin Christian**	(SIGNATURE)	Date:

1.0 Scope:

The requirements described in this procedure apply to all areas of the warehouse where Client finished products, and / or raw materials will reside or be temporarily held.

2.0 Purpose:

This procedure describes the minimum requirements for effective cleaning and sanitation of areas at the HubStarr Logistics facility storing clients finished products and / or raw materials.

3.0 Responsibility:

3.1. HubStarr Logistics management is responsible for ensuring compliance with this procedure.

3.2. The responsibility for the sanitation program must be assigned to one or more qualified employees.

3.3. This procedure is required reading for all warehouse, sanitation and maintenance personnel.

4.0 References:

None

5.0 Definitions and Abbreviations:

5.1. Master Sanitation Schedule – All the cleaning tasks, frequency of completing the tasks, and the department responsible for completing the task(s). This schedule includes the warehouse and fulfillment areas. Bathrooms break room and office areas are assigned to rotating employees.

5.2. Cleaning checklists are checklists with tasks called out on the Master Sanitation Schedule.

5.3. These checklists must contain an area on the list where the person completing the task can sign their name when the task is completed.

6.0. Process:

6.1. A Master Sanitation schedule is on hand for both the interior and exterior of the facility.

6.2. All tasks called out on the Master Sanitation schedule include a work instruction.

6.3. Work Instructions specify:

6.3.1 Responsibility for each task

6.3.2 Frequency of cleaning

6.3.3 Specific chemicals, cleaners and sanitizers to be used.

6.3.4 Water temperature requirements if applicable

7.0. A Master Sanitation schedule is on hand for both the interior and exterior of the facility.

7.4. Checklist are provided and signed after completion.

7.5. All areas of the facility must be kept clean, orderly and free from the accumulation of litter, Spills and damaged products.

7.6. All floors and 18” perimeters along the walls should be kept clean with no accumulations of debris.

7.7. Containers of garbage, trash and waste materials must be emptied at a frequency to prevent waste accumulation.

7.8. All air circulation equipment and components such as blowers, fan vents and grids must be kept free of dirt and/or grease build-up.

7.9. Evidence of mold, mildew or dirt on floors, ceilings or equipment must be prevented.

7.10. Material handling equipment that comes into contact with the packaging shipping components of finished goods or raw materials must be cleaned.

7.11. Lids on dumpster containers will be kept closed and container emptied on a frequency to prevent trash from collecting on the ground.

7.12. During cleaning, adequate protection must be in place to ensure that clients finished products, packaging or raw materials are not contaminated.

8.0. Document History:
