Standard Operating Procedure

SOP – AZ 109 Handling and Storage of Clients Materials

Author:	**Ruben Urias**	(SIGNATURE)	Date:
Revised By:	**Ruben Urias**	(SIGNATURE)	Date: 5/7/2024

Review & Approval

Functional Manager	**Corbin Christian**	(SIGNATURE)	Date:

1.0 **Scope:** To outlines the steps followed when handling and storing raw materials, packaging components and finished product to maintain compliance within the scope of Clients and any third party logistics warehouses storing Clients product.

2.0 **Purpose:** To ensure all team members are trained on the correct procedure for the handling and storage of all Clients materials.

3.0 **Responsibility:** It is the responsibility of all team members to follow the correct procedure for handling and storage of all Clients materials. It is also the responsibility of all Leads, Supervisors, and Managers to ensure all employees are trained on the correct procedure for handling and storage of Clients materials.

4.0 **References:**

5.0 **Definitions and Abbreviations:**

6.0 **Process:**

6.1. Any employee handling any material must refer to the container labeling description, MSDS, Purchase Order, packing list for special instructions, Certificate of Analysis, Certificate of Compliance, and any storage conditions such as temperature, relative humidity, or light when transporting or handling any warehouse goods.

6.2. For new or revised items, contact Clients immediately for additional instructions and information on proper handling.

6.3. All inbound shipments must be visually inspected for signs of contamination.

6.3.1. Any damaged or rejected material must be placed into the Quarantine location in the warehouse.

6.3.2. Clients must be notified of any discrepancies.

6.4. Ensure that Personal Protective Equipment (PPE) is worn before handling any material and use the appropriate equipment to facilitate the relocation of product (pallet jack, forklift, etc).

6.4.1. Guidelines of personal responsibility of hygiene and cleanliness must be followed at all times when handling raw or finished goods.

6.5. After receiving material into inventory, the product must be immediately transported to the appropriate storage location.

6.6. Raw allergen materials must be clearly labelled, segregated and/or separated from any other raw materials that are stored or staged in the warehouse. This includes storing above in racking, there should be at least a bay between any allergen material and any other raw materials. Allergen products will include Milk, Fish, Eggs, Crustacean Shellfish, Tree nuts, Peanuts, Wheat and Soybeans.

6.7. Anyone handling material must adhere to the following requirements:

6.7.1. All boxes must be closed and sealed unless used in pick in pack

6.7.2. All product must be palletized and stored off the floor.

6.7.3. Product should not be stored in front of an EXIT.

6.7.4. Product should not be stored in front of a fire extinguisher.

6.7.5. Product should not block an air circulation vent.

6.7.6. Product should not be exposed to direct heat or cold unless specified by material's labeling or expressly communicated by Clients.

6.7.7. Product should not be stored near chemicals, cleaning agents, maintenance supplies or equipment.

6.7.8. Racks must be maintained away from the wall to allow access for cleaning and pest control.

6.7.9. Remove and/or repair damaged/broken rack systems and pallet.
