Standard Operating Procedure

SOP – AZ 110 Good Documentation Practices			
Author:	**Ruben Urias**	(SIGNATURE)	Date:
Revised By:	**Ruben Urias**	(SIGNATURE)	Date: 5/7/2024

Review & Approval

Functional Manager	**Corbin Christian**	(SIGNATURE)	Date:

1.0 Scope:
All quality data or records maintained by HubStarr Logistics departments under jurisdiction of global Regulatory Agencies.

2.0 Purpose:
To define the requirements of good documentation practices as part of current Good Manufacturing Practices (cGMPs) as defined by the U.S. Food and Drug Administration.

3.0 Responsibility:
All personnel involved with cGMP documentation as part of their responsibilities are required to follow this procedure.

4.0 References:
None

5.0 Definitions and Abbreviations:
None

6.0 Process:

6.1 All hand written entries must be in permanent, indelible ink (either black or blue). Red ink may be used for revisions to quality documents.

6.2 All entries must be made directly onto Quality Documents or on supporting paperwork. The use of scrap paper or Post-it® is prohibited.

6.3 Record all entries in a clear manner for readability.

6.4 No blank spaces are allowed. A "N/A" (not applicable) or a line-through an unused space must be added to all fields where no entry is required.

6.5 Full signatures are required at least once per page. A full signature must include at least a first initial and a full last name. Additional entries can be initials. Each signature or initials must be accompanied by a date.

6.6 For U.S. dating, the format shall be month/day/year or month-day-year. International dating may be day/month/year or day-month-year.

6.7 Obliteration of entries is prohibited.

6.8 Incorrect entries require a single line through each entry so the original entry can still be read. The new entry should be made next to the original with a short explanation for the change. If space is limited to explain the incorrect entry, a footnote can be used.

6.9 Corrections to controlled quality documents are not allowed.

6.10 Raw data must not be destroyed. Revision or superseding of data/information must be appropriately annotated with signature/date.

6.11 All multi page adjustments must be reviewed by a second person for accuracy and completeness.
6.12 Pre-dating and posting entries is prohibited.
6.13 Personnel must not make entries for other people.
6.14 Falsification of any information or data is prohibited.
6.15 Examples of acceptable and unacceptable documentation practices:

Acceptable
Jane Doe 08/08/2008
Jane Doe 08-08-2008
J. Doe 08/08/2008
JD 08/08/2008 (Only if signature already exists on the page)
Jane Doe 08/08/~~07~~ 08 Wrong year JD 08/08/08

Unacceptable

Jane D. 08/08/2008	**(last name missing)**
Jane Doe 08-08	**(missing the day)**
Jane Doe 08/0/~~07~~ 08 Error JD 08/08/08	**(reason of "error" not descriptive)**
Jane Doe 08/08/~~07~~ 08	**(no single line correction)**
JD 08/08/2008	**(not a full signature)**

7. DOCUMENT VERIFICATION AND REVIEWER TRAINING

7.1 Second-Person Verification Requirement

All multi-page quality records and any record used as evidence for a food safety control (pre-op checklists, sanitation logs, temperature records, receiving inspection records, corrective action forms) shall be reviewed by a qualified second person for accuracy, completeness, and legibility before filing. The verifier shall sign and date the record in a designated verification field. The verifier must be a different individual than the person who created the original entry.

7.2 Verifier Qualification

A qualified document verifier is any HubStarr Logistics employee who has completed GDP training (this SOP) and has been designated as a verifier by Sr. Compliance or the PCQI. Verifier training shall be documented in the employee training record (Training_and_Records/). New verifiers shall complete GDP training before performing any verification. Verifier qualification shall be re-confirmed annually.

7.3 Verifier Training Record

Sr. Compliance (Ruben Urias) shall maintain a current list of qualified document verifiers for Glendale North (9701) and Glendale South (9501). The list shall include: employee name, facility, date of GDP training completion, and date of last annual reconfirmation. This list is filed in Training_and_Records/ and shall be updated within 5 business days of any change.

8. SOP WRITING GUIDE AND TEMPLATE

8.1 When to Write an SOP

A Standard Operating Procedure (SOP) is required whenever a task: (a) must be performed consistently to ensure food safety or regulatory compliance; (b) involves multiple steps that could be performed incorrectly or inconsistently without written guidance; (c) is referenced by an external standard (PrimusGFS, FSMA, customer requirement); or (d) must be demonstrated to an auditor. When in doubt, consult the PCQI.

8.2 AZ-Numbering Convention

SOPs at HubStarr Logistics use an AZ-XXX prefix (e.g., AZ-110, AZ-206). The PCQI assigns the next available AZ number before drafting begins. AZ numbers are reserved exclusively for true procedural documents (step-by-step operational procedures). Programs, plans, policies, logs, rosters, and specifications do not receive an AZ prefix and use descriptive names (e.g., Allergen-Control-Program, Customer-Complaint-Log, CAPA-Log). The SOP Master List (SOPs/SOP_Master_List.xlsx) is the authoritative registry.

8.3 Required SOP Structure

All HubStarr SOPs shall use the standard template (clone from any existing AZ-1XX SOP in SOPs/) and include the following sections in order:

1. Purpose — Why this SOP exists; what requirement it satisfies (cite standard and section).

2. Scope — Which facilities (9701 / 9501 / both), which personnel, which activities are covered.

3. Definitions — Define any technical or company-specific terms used in the SOP.

4. Responsibilities — Who owns the procedure; who implements it; who verifies it.

5. Procedure — Numbered, sequential steps. Use plain language. Avoid vague verbs ('ensure', 'check') — write observable actions ('sign and date the pre-op log in the designated field').

6. Records / Monitoring — What records are generated; where they are filed; retention period.

7. Related Documents — List all referenced SOPs, forms, logs, or programs by name.

8. Document History — Use the standard header table and Document History table from the template.

8.4 Review and Approval

All new and revised SOPs shall be: (a) drafted by the PCQI or designated author; (b) reviewed by Sr. Compliance for operational accuracy; (c) approved and signed by the PCQI and Functional Manager before release; (d) distributed to all applicable personnel with training documented. Draft SOPs carry the suffix '_v1-DRAFT' until PCQI-signed; finalized SOPs use '_v1' or higher. Only finalized, PCQI-signed SOPs are valid for audit evidence.

8.5 Annual Review

Each SOP shall be reviewed at minimum annually by the PCQI or designated reviewer. Review shall confirm the SOP reflects current operations, personnel, and regulatory requirements. If no changes are required, the reviewer signs the Document History table with the review date. If changes are required, a new version is issued per Section 8.4.

7.0 Document History:

Revision	Change	Effective date
ORG	Original Issue	10/10/20
Rev A	**Update company change of name and Logo,** all references of Axle to HubStarr. Process Reviewed.	5/7/2024

This process is required to be reviewed, at a minimum, on a 3-year cycle. If there are no changes to the previous revision the signature below is evidence of the review and approval of this procedure.
