Review & Approval

Functional Manager **Ruben Urias**	(SIGNATURE)	Date: 10/15/2025

1. Purpose

To establish a standardized procedure for conducting internal audits that evaluate compliance with food safety policies, procedures, and regulatory requirements across all operational areas.

---

2. Scope

This SOP applies to all HubStarr Logistics warehouse locations. The inspection procedures described herein must be followed uniformly at every site, regardless of location or building designation.

---

3. Responsibilities

- Site Leads: Conduct daily, weekly, monthly and annual inspections at their assigned locations; complete inspection checklists using the designated electronic platform; and implement corrective actions.
- Audit Facilitator: Coordinates and conducts annual audits, ensures documentation is accurate, and maintains the master inspection checklist.
- Compliance Manager: Reviews audit findings across all locations, verifies corrective actions, and maintains audit records.

---

4. Frequency

- Inspections are conducted at the following intervals at each site using the approved inspection checklist:
- Daily: General housekeeping, 5S, security checks, employee procedures, PPE compliance, and personal hygiene.
- Weekly: Equipment safety, facility condition, dock doors, eyewash stations, fire extinguisher spot-checks, and slip/trip/fall hazards.

- Monthly: Dangerous goods and temperature control, security and access control, pest trap monitoring, inventory accuracy, facilities and electrical systems, and emergency preparedness and documentation checks.
- Annually: Professional fire extinguisher maintenance, employee training record verification, storage rack and shelving structural integrity, ventilation and HVAC systems, records and documentation completeness, facility security assessment, and emergency response plan and equipment review.
- Additional inspections may be scheduled following incidents, regulatory inspections, or significant operational changes.

---

5. Procedure

1. **Preparation**
    - Review previous audit findings and corrective actions.
    - Prepare the latest version of the approved inspection checklist for the site being audited.
    - Notify site leads of the scheduled audit date.
2. **Execution**
    - Conduct a walkthrough of all operational areas including:
        - Aisles, walkways, and emergency exits
        - Dock areas and doors (interior/exterior)
        - Equipment and charging zones
        - Storage racks and shelving
        - Sanitation and housekeeping areas (floors, breakrooms, bathrooms)
        - PPE stations, eyewash stations, and first aid kits
        - Hazmat and dangerous goods storage areas
        - Security and access control points
        - CCTV, lighting, and perimeter fencing
    - Use the approved inspection checklist to mark compliance (Yes/No/N/A) and document comments.
    - Identify any unusual occurrences and initiate a NUOCA entry if applicable.
3. **Documentation**
    - Complete the inspection checklist and submit electronically with a digital signature. Save a copy in the designated compliance folder.
    - If corrective actions are required, complete the Closing Section of the checklist including: location of issue, issue description, root cause, corrective and preventative actions, assigned personnel, and due date.
    - Log any unusual occurrences in the NUOCA Log tab as applicable.
4. **Follow-Up**
    - Assign corrective actions to responsible personnel.
    - Verify completion of corrective actions within 14 days.

- Conduct re-audit if necessary.

---

6. Records

- Completed inspection checklists (electronic submissions)
- NUOCA Log entries
- Corrective action reports
- Verification sign-offs

All records must be retained for at least 24 months and be accessible for regulatory or third-party audits.

---
