Review & Approval

Functional Manager	**Corbin Christian**	(SIGNATURE)	Date:3/22/22

1. Scope: This procedure specifies when the risk management process described in this document is either encouraged or required by HubStarr Logistics participants and /or stakeholders.

2. Purpose: The purpose of this procedure is to provide HubStarr Logistics risk review participants with guidance on the application of consistent and comprehensive methods for risk management. This procedure provides information on how to identify, analyze, evaluate, and react to risk(s) associated with decisions made under the program, e.g. risks inherent to the program, and risks associated with recognition decisions based on program outcomes. This procedure will also assist in confirming whether or not the HubStarr Logistics management system effectively mitigates these risks.

3. Responsibility:
   HubStarr Logistics ability to conduct effective risk management is dependent upon having an appropriate risk governance structure and well-defined roles and responsibilities.
   Decision makers (HubStarr Management and/or Compliance Manager) should: • Take responsibility for coordinating risk management across various HubStarr functions, • Ensure that a risk management process is defined, deployed and reviewed, and that adequate resources are available, and • Communicate key risk issues to the Executive Management Team.
4. References:
   None
5. Definitions and Abbreviations:
   - Risk: Effect of Uncertainty
   - Review: Activity undertaken to determine the suitability, adequacy and effectiveness of the subject matter to achieve established objectives.
   - Risk Management: Coordinated activities to direct and control an organization with regard to risk.

6. **Procedures:**

6.1. A Risk Review participant should be familiar with the concepts and tools described in this document and encourage incorporating them into day-to-day Risk Review projects and related deliverables; including technical assessment activities as needed.

6.2. Risk Management should include systematic processes designed to coordinate, facilitate and improve science-based decision making with respect to risk. Possible steps used to initiate and plan a risk management process include:

6.2.1. Identify any existing hazards (once we have identified whether any hazards exist with a process, we then can estimate and analyze the risk associated with those hazards)

6.2.2. Assemble available information and/or data on relevant potential hazards, and harm on consumer health and/or impact on compliance with regulatory requirements.

6.2.3. Define the problem and/or risk question, including pertinent assumptions identifying the potential for risk.

6.2.4. Specify a timeline, deliverables and appropriate level of decision making for the risk management process.

6.2.5. Any integrity findings will be notated on HubStarr Risk Assessment Form and immediately reported to appropriate liability group for repair.

7. Forms:

7.1. HubStarr Logistics Risk Review form

8. Document History:

Revision	**Change**	**Effective date**
ORG	Original Issue	**3/22/22**
Rev A	**Update company change of name and Logo,** all references of Axle to HubStarr. Process Reviewed.	5/7/2024

This process is required to be reviewed, at a minimum, on a 3-year cycle. If there are no changes to the previous revision the signature below is evidence of the review and approval of this procedure.
