Standard Operating Procedure

SOP – AZ 130 Document Control SOP

Author: Sam Vargas	(SIGNATURE)	Date:
Revised By: Sam Vargas	(SIGNATURE)	Date:

Review & Approval

Functional Manager	(SIGNATURE)	Date:

1. Purpose

To define the process for managing documented information to ensure accuracy, consistency, accessibility, and proper retention across warehouse and compliance operations.

2. Scope

This procedure applies to all documents used to support operational, safety, and compliance activities, including procedures, forms, checklists, and records.

3. Responsibilities

- **Warehouse Lead / Compliance:**
  - Ensure documents are properly created, reviewed, and maintained.
  - Coordinate updates and control access to current versions.
  - Maintain a document control log.
- **Manager:**
  - Review and approve new or revised documents.
  - Ensure alignment with operational and compliance requirements.
- **All Staff:**
  - Use only the latest approved versions.
  - Report any outdated or missing documents.

4. Procedure

4.1 Document Creation

- 4.1 Standard Operating Procedure (SOP) Content Requirements
- All SOPs created under this procedure must include the following standardized elements to ensure clarity, consistency, and effective implementation:
  - What is to be done: Clear description of the task or activity.
  - How it is done: Step-by-step instructions, including any tools, materials, or safety precautions required.
  - How often: Defined frequency (e.g., daily, weekly, upon receipt, annually).
  - By whom: Specific role or position responsible for performing the task (e.g., Warehouse Lead, Compliance Manager).
- Recordings and corrective actions:
  - What records must be completed (e.g., log, checklist, form).
  - Immediate corrective actions to take if a deficiency is identified (e.g., quarantine product, notify supervisor, document in NUOCA log).

- These elements ensure SOPs can be used effectively for training and as reference tools during operations and audits.

4.2 Review and Approval

- All documents must be reviewed by relevant personnel.
- Final approval must be documented with name, date, and signature.
- Maintain a record of approvals.

4.3 Distribution and Access

- Store documents in a secure, centralized location (e.g., shared drive or document system).
- Grant access only to authorized personnel.
- Prevent use of outdated or unapproved versions.

4.4 Revision and Updates

- Initiate revisions when changes occur in process, regulation, or structure.
- Document all changes in a revision history log.
- Assign a new version number and follow the same review/approval process.

4.5 Retention and Archiving

- Retain documents for a minimum of 10 years or as required by internal policy.
- Clearly mark archived documents and store them securely.
- Dispose of obsolete documents in a controlled manner.

---

5. Definitions

- Controlled Document: A document that is subject to version control and approval.
- Obsolete Document: A document that has been replaced or is no longer in use.
- Documented Information: Any information required to be maintained and controlled to support operations and compliance.

6. Document History

Revision	Change	Effective date
ORG	Original Issue	**10/28/25**
Rev. 1	Added SOP Content requirements	**12/22/25**

This process is required to be reviewed, at a minimum, on a 3-year cycle. If there are no changes to the previous revision the signature below is evidence of the review and approval of this procedure.
